BNB Auction - New Zealand User Only

2021-09-21

It's an **auction by trading volume** based campaign where participants need to **trade to bid** at the auction, a total of 3 BNB will be auctioned off with a starting price of \$10. **Participants won't be required to actually pay the bidding price** and the only requirement is to have a total trading volume of at least 100x the Bid Price that he/she is putting (More Info Below. **No Payment whatsoever is required to win the reward!**)

Campaign Structure

1. Bid price starting from \$10, and entry using [this form](#)
2. Bidding will stay open until 3 days (Per Auction period)
3. Re-bidding (**edit the form**) with higher price is allowed, lower price is not.
4. Re-bid with a higher price will be eligible as long as the total trading volume of that participant during the campaign period is at least 100x the final bid price.

Example: Participant A's First Bid was \$50, then Participant A would like to re-bid with \$100. This action is eligible as long as Participant's A total trading volume during the auction period (3 days) was at least \$10,000 (100x\$100) or higher.

Winning Bid BNB Distribution Mechanism

To ease the reward distribution process, we won't require the winner to send us the bid price, instead we will adjust the BNB amount accordingly after subtracting the winning bid from 1 BNB.

Example:

- Participant A won the auction with the bid price of \$50.
- We will not ask Participant A to send us the \$50 to get the 1 BNB.
- But Instead, we will send 1BNB - 0,125BNB (equals to \$50) = 0,875 BNB to Participant A
- Conversion rate from Winning Bid Price to BNB is taken (snapshotted) the next day of the auction (4th day)
- Can't Bid More Than BNB's actual price that's been decided on Day 1 of each Auction

Dear Binancian,

Binance constantly reviews its product offerings and activities, against user demand, evolving regulatory requirements and future opportunities, to determine changes and improvements. As part of that process, we will restrict the following product offerings for **users from New Zealand**:

- Futures
- Options
- Leveraged Tokens
- Dual Investment
- Liquidity Farming
- Swap Farming
- DeFi Staking
- BNB Vault
- Binance Pool

With effect from 15 August 2022, you will have 30 days to redeem, reduce and close any existing positions you may have in these products, with the exception of Dual Investment where existing positions will remain until their respective expiries.

For Futures, you will be able to top-up your margin balance to prevent margin calls and liquidations, but you will not be able to increase your existing positions or open a new position.

For Binance Pool, please disconnect your mining rigs from Binance Pool, you will not be able to get mining rewards after 15 August 2022.

For Liquidity Farming, users can redeem and remove liquidity from Liquid Swap before 14 September 2022. Thereafter Binance will close the positions progressively, and users' balances will be returned back to their spot wallet.

Please monitor any open positions you have and close or redeem them **before 14 September 2022**. Thereafter Binance will close any remaining open positions progressively. Regular trading fees will apply for the automatic settlement.

Users Residing Outside New Zealand

The current restrictions in this notice apply to existing users we believe may be ordinarily residing in New Zealand. If you reside in a non-restricted region, please first submit your Proof-of-Address document to complete [Verified Plus] verification, and then contact our Customer Support Team to ensure you can continue to access our products. Acceptable documents include bank statements and utility bills. Our Verification FAQ can guide you on how to submit your documents.

We aim to make this transition as straight-forward as possible. Should you have any questions, please feel free to reach out to our Customer Support Team for assistance.

Thank you,
Binance
